Working on Your Computer

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have performed the steps in Working on Your Computer.
- You have read the safety information that shipped with your computer.
- A component can be replaced or--if purchased separately--installed by performing the removal procedure in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

CAUTION: Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

 **CAUTION:** When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

 **NOTE:** The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
2. Turn off your computer (see *Turning Off Your Computer*).
3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.

 **CAUTION:** To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

4. Disconnect all network cables from the computer.
5. Disconnect your computer and all attached devices from their electrical outlets.
6. Close the display and turn the computer upside-down on a flat work surface.

 **NOTE:** To avoid damaging the system board, you must remove the main battery before you service the computer.

7. Remove the main battery.
8. Turn the computer top-side up.
9. Open the display.
10. Press the power button to ground the system board.

 **CAUTION:** To guard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

 **CAUTION:** Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe
- Flash BIOS update program CD

Turning Off Your Computer

CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

1. Shut down the operating system:

- In Windows Vista :

Click **Start** , then click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

- In Windows XP:

Click **Start** → **Turn Off Computer** → **Turn Off** . The computer turns off after the operating system shutdown process is complete.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

 **CAUTION:** To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
2. Connect any telephone or network cables to your computer.

 **CAUTION:** To connect a network cable, first plug the cable into the network device and then plug it into the computer.

3. Replace the battery.
4. Connect your computer and all attached devices to their electrical outlets.
5. Turn on your computer.

Battery

Removing The Battery

1. Follow the procedures in *Before Working On Your Computer*.
2. Slide the release latches to unlock the battery.

3. Slide the battery and remove it from the computer.

Installing The Battery

1. Slide the battery into its slot until it clicks into place.
2. Follow the procedures in *After Working Inside Your Computer*.

Memory Card

Removing The Memory Card

1. Follow the procedures in *Before Working On Your Computer*.
2. Press in on the memory card to release it from the computer.

3. Slide the memory card out of the computer.

Installing The Memory Card

1. Push the memory card into the compartment until it snaps into place.
2. Follow the procedures in *After Working Inside Your Computer*.

Subscriber Identity Module (SIM) Card

Removing The Phone Subscriber Identity Module (SIM)

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Press in on the SIM card to release it from the computer.

4. Grasp the SIM card and pull out to release it from the computer.

Installing The Phone Subscriber Identity Module (SIM)

1. Push the SIM card into the slot until it is fully engaged.
2. Install the *battery*.
3. Follow the procedures in *After Working Inside Your Computer*.

Access Panel

Removing The Access Panel

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the screws that secures the access panel to the base of the computer.

4. Lift the access panel up at an angle and remove it from the computer.

Installing The Access Panel

1. Tighten the screws to secure the access panel to the base of the computer.
2. Install the *battery*.
3. Follow the procedures in *After Working Inside Your Computer*.

Memory

Removing The Memory Module

1. Follow the procedures in *Before Working On Your Computer*
2. Remove the *battery*.
3. Remove the *access panel*.
4. Pry the retention clips away from the memory module until it pops up.

5. Remove the memory module from its connector on the system board.

Installing The Memory Module

1. Insert and secure the memory module to the system board.
2. Install the *access panel*.
3. Install the *battery*.
4. Follow the procedures in *After Working Inside Your Computer*.

Optical Drive

Removing The Optical Drive

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *access panel*.
4. Remove the screw that secures the optical drive to the computer.

5. Use a screwdriver to pry the optical drive out of the computer.

Installing The Optical Drive

1. Slide the optical drive into its compartment on the chassis.
2. Tighten the screw to secure the optical drive to the computer.
3. Install the *access panel*.
4. Install the *battery*.
5. Follow the procedures in *After Working Inside Your Computer*.

Hard Drive

Removing The Hard Drive

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *access panel*.
4. Open the clip that secures the hard-drive assembly to the computer.

5. Disconnect the hard-drive cable from the hard drive.

6. Remove the screws that secure the hard-drive assembly to the computer.

7. Lift the hard drive up at an angle from the system and remove it from the computer.

8. Remove the screws that secure the hard-drive bracket to the hard drive.

9. Lift the hard-drive bracket up and away from the hard drive.

10. Remove the hard drive board from the hard drive.

Installing The Hard Drive

1. Install the screws to secure the hard drive board to the hard drive.
2. Place the hard drive in its compartment .
3. Replace the screws to secure the hard drive to the system.
4. Connect the hard drive cable to the system board.
5. Replace the hard drive cable securing clip.
6. Install the *access panel*.
7. Install the *battery*.
8. Follow the procedures in *After Working Inside Your Computer*.

Wireless Local Area Network (WLAN) Card

Removing Wireless Local Area Network (WLAN) Card

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the access panel.
4. Disconnect the antenna cables from the WLAN card.

5. Use a scribe to pry the latch to release the WLAN card.

6. Remove the WLAN card from the computer.

Installing The Wireless Local Area Network (WLAN) Card

1. Slide the WLAN card into its slot.
2. Connect the antenna cables according to the color code on the WLAN card.
3. Install the *access panel*.
4. Install the *battery*.
5. Follow the procedures in *After Working Inside Your Computer*.

Keyboard

Removing The Keyboard

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Using a small plastic scribe, release the four latches that secures the keyboard to the computer.

4. Flip the keyboard over and lay it on the palm rest.

5. Open the clip to release the keyboard cable.

6. Disconnect the keyboard cable from its connector on the system board.

7. If your computer comes with a backlit keyboard, disconnect the keyboard backlight cable.

8. Remove the keyboard from the computer.

Installing The Keyboard

1. Connect the keyboard data cable to the system board.
2. Install the *battery*.
3. Follow the procedures in *After Working Inside Your Computer*.

Wireless Wide Area Network (WWAN) Card

Removing The Wireless Wide Area Network (WWAN) Card

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *keyboard*
4. Open the power button board cable securing clip.

5. Disconnect the power button board cable.

6. Disconnect the antenna cables from the WWAN card.

7. Use a scribe to pry the latch that secures the WWAN card.

8. Remove the WWAN card from the computer.

Installing The Wireless Wide Area Network (WWAN) Card

1. Slide the Wireless Wide Area Network (WWAN) card into its slot.
2. Connect the antenna cables according to the color code on the WWAN card.
3. Install the *power button board cable*.
4. Install the *keyboard*.
5. Install the *battery*.
6. Follow the procedures in *After Working Inside Your Computer*.

Palm Rest

Removing The Palm Rest

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *hard drive*.
6. Remove the *keyboard*.
7. Remove the rubber from the bottom of the computer.

8. Remove the screws that secure the palm rest to the bottom of the computer.

9. Open the clip that secures the power-button board cable to the system board.

10. Disconnect the power-button board cable from its connector on the system board.

11. Open the clip that secures the LED board cable to the system board.

12. Disconnect the LED board cable from its connector on the system board.

13. Open the clip that secures the touchpad data cable to the system board.

14. Disconnect the touchpad data cable from its connector on the system board.

15. Open the clip that secures the finger print reader cable to the system board.

16. Disconnect the finger print reader cable from its connector on the system board.

17. Open the clip that secures the quick launch board cable to the system board.

- 18.** Disconnect the quick launch board cable from its connector on the system board.

- 19.** Remove the screws that secure the palm rest to the front of the computer.

20. Pry along the edges of the palm rest to release the palm rest.

21. Lift the palm rest up and away from the computer.

Installing The Palm Rest

1. Starting from the right edge of the palm rest, press downwards on the computer to engage the tabs.
2. Work your way around the edges and ensure the tabs are fully engaged.
3. Connect all cables to the system board.
4. Tighten the screws to secure the palm rest.
5. Tighten the screws on the bottom of the computer to secure the palm rest.
6. Install the *keyboard*.
7. Install the *hard drive*.
8. Install the *access panel*.
9. Install the *memory card*.
10. Install the *battery*.
11. Follow the procedures in *After Working Inside Your Computer*.

Speaker

Removing The Speaker

1. Follow the procedures in *Before Working on Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *hard drive*.
6. Remove the *keyboard*.
7. Remove the *palm rest*.
8. Disconnect the speaker cable from its connector on the system board.

9. Release the speaker from its securing posts.

10. Release the speaker cable from the routing channel.

11. Lift the speakers up and away from the computer.

Installing The Speaker

1. Install the speaker cable in the routing channel.
2. Install the speaker to its securing posts.
3. Connect the speaker cable.
4. Install the *palm rest*.
5. Install the *keyboard*.
6. Install the *hard drive*.
7. Install the *access panel*.
8. Install the *memory card*

9. Install the *battery*.
10. Follow the procedures in *After Working Inside Your Computer*.

Fingerprint Reader

Removing The Fingerprint Reader

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *hard drive*.
6. Remove the *keyboard*.
7. Remove the *palm rest*.
8. Release the fingerprint reader cable from the adhesive affixing it to the palm rest.

9. Remove the screw that secures the fingerprint reader bracket.

10. Lift up the fingerprint reader bracket at an angle and remove it from the computer.

11. Lift up the fingerprint reader board and remove.

Installing The Fingerprint Reader

1. Install the fingerprint reader board and the bracket.
2. Tighten the screws that secure the fingerprint reader bracket.
3. Affix the finger print reader cable to the palm rest.
4. Install the *palm rest*.
5. Install the *keyboard*.
6. Install the *hard drive*
7. Install the *access panel*.
8. Install the *memory card*.
9. Install the *battery*.
10. Follow the procedures in *After Working Inside Your Computer*.

LED Board

Removing The LED Board

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *hard drive*.
6. Remove the *keyboard*.
7. Remove the *palm rest*.
8. Peel open the tape that secures the LED board cable.

9. Pry the latches that secure the LED board; then lift up and remove the LED board from the computer.

Installing The LED Board

1. Secure the latches to the LED board.
2. Affix the tape to secure the LED board cable.
3. Install the *palm rest*.
4. Install the *keyboard*.
5. Install the *hard drive*.
6. Install the *access panel*.
7. Install the *memory card*.
8. Install the *battery*.
9. Follow the procedures in *After Working Inside Your Computer*.

Power-Button Board

Removing The Power-Button Board

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *memory*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *palm rest*.
9. Remove the screw that secures the power-button board.

10. Pry the latch to release the power-button board; then lift up and remove it from the computer.

Installing The Power-Button Board

1. Install the power-button board and tighten the screw.
2. Install the *palm rest*.
3. Install the *keyboard*.
4. Install the *hard drive*
5. Install the *memory*.
6. Install the *access panel*.
7. Install the *memory card*.
8. Install the *battery*.
9. Follow the procedures in *After Working Inside Your Computer*.

Quick Launch Button Board

Removing The Quick Launch Button Board

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *memory*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *palm rest*.
9. Release the quick launch button board cable from the adhesive affixing it to the palm rest.

10. Remove the screw that secures the quick launch button board.

11. Pry the latches to release the quick launch button board; then lift up and remove it from the computer.

Installing The Quick Launch Button Board

1. Install the quick launch button board and tighten the screw.
2. Affix the quick launch button board cable to the palm rest.
3. Install the *palm rest*.
4. Install the *keyboard*.
5. Install the *hard drive*
6. Install the *memory*.
7. Install the *access panel*.
8. Install the *memory card*.

9. Install the *battery*.
10. Follow the procedures in *After Working Inside Your Computer*.

Coin-Cell Battery

Removing The Coin-Cell Battery

1. Follow the procedures in *Before Working on Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *hard drive*.
6. Remove the *keyboard*.
7. Remove the *palm rest*.
8. Pry the tabs that secure the coin-cell battery to the system board.

Installing The Coin-Cell Battery

1. Insert the coin-cell battery into the slot and press until it snaps into place.
2. Install the *palm rest*.
3. Install the *keyboard*.

4. Install the *hard drive*.
5. Install the *access panel*.
6. Install the *memory card*
7. Install the *battery*
8. Follow the procedures in *After Working Inside Your Computer*.

Heat Sink

Removing The Heat Sink

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *memory*.
6. Remove the *WLAN card*.
7. Remove the *optical drive*.
8. Remove the *hard drive*.
9. Remove the *keyboard*.
10. Remove the *WWAN card*.
11. Remove the *palm rest*.
12. Remove the *display assembly*.
13. Remove the *system board*.
14. Lift the heat sink and fan assembly up and away from the system board.

Installing The Heat Sink

1. Install the heat sink in the slot.
2. Install the *system board*
3. Install the *display assembly*.
4. Install the *palm rest*.
5. Install the *WWAN card*.
6. Install the *keyboard*.
7. Install the *hard drive*
8. Install the *optical drive*.
9. Install the *WLAN card*.
10. Install the *memory*.
11. Install the *access panel*.
12. Install the *memory card*.
13. Install the *battery*.
14. Follow the procedures in *After Working Inside Your Computer*.

Processor

Removing The Processor

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *memory*.
6. Remove the *WLAN card*.
7. Remove the *optical drive*.
8. Remove the *hard drive*.
9. Remove the *keyboard*.
10. Remove the *WWAN card*.
11. Remove the *palm rest*.
12. Remove the *display assembly*.
13. Remove the *system board*.
14. Using a flat-blade screwdriver, rotate the processor cam lock in a counter-clockwise direction.

15. Lift the processor up and away from the system board.

Installing The Processor

1. Insert the processor into the processor socket. Ensure the processor is properly seated.
2. Tighten the cam lock in a clockwise direction.
3. Install the *system board*
4. Install the *display assembly*.
5. Install the *palm rest*.
6. Install the *WWAN card*.
7. Install the *keyboard*.
8. Install the *hard drive*

9. Install the *optical drive*.
10. Install the *WLAN card*.
11. Install the *memory*.
12. Install the *access panel*.
13. Install the *memory card*.
14. Install the *battery*.
15. Follow the procedures in *After Working Inside Your Computer*.

Display Assembly

Removing The Display Assembly

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Disconnect the antenna cables from the routing channel.

11. Pull out the antenna cables from the routing hole.

12. Disconnect the display cable from the system board.

13. Release the WWAN cables from the routing channel.

14. Remove the screws that secure the display assembly to the computer.

15. Lift the display assembly up from the computer, then forward and remove.

Installing The Display Assembly

1. Attach the display assembly to the base of the computer.
2. Tighten the screws to secure the display assembly.
3. Secure the antenna cables to the routing channels.
4. Connect display cable to system board.
5. Connect antenna cables to installed wireless solutions.
6. Install the *palm rest*.
7. Install the *WWAN card*.
8. Install the *keyboard*.

9. Install the *hard drive*.
10. Install the *WLAN card*.
11. Install the *access panel*.
12. Install the *memory card*.
13. Install the *battery*.
14. Follow the procedures in *After Working Inside Your Computer*.

Display Bezel

Removing The Display Bezel

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Remove the *display assembly*.
11. Using a plastic scribe, pry under the display bezel to release it from the display assembly.

12. Lift the display bezel and remove it from the display assembly.

Installing The Display Bezel

1. Place the display bezel on the computer.
2. Starting from the bottom edge, press downward on the display bezel to engage the tabs.
3. Work your way around the sides and top edge.
4. Install the *palm rest*.
5. Install the *WWAN card*.
6. Install the *keyboard*.
7. Install the *hard drive*.
8. Install the *WLAN card*.
9. Install the *access panel*.
10. Install the *memory card*.
11. Install the *battery*.
12. Follow the procedures in *After Working Inside Your Computer*.

Camera

Removing The Camera

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Remove the *display assembly*.
11. Remove the *display bezel*.
12. Disconnect the camera cable.

13. Peel off tape that secures the camera.

14. Pry the latch; then lift up the camera.

Installing The Camera

1. Install display camera and connect the camera cable.
2. Stick back tape that secures the display camera..
3. Install the *display bezel*.
4. Install the *display assembly*.
5. Install the *palm rest*.
6. Install the *WWAN card*.
7. Install the *keyboard*.
8. Install the *hard drive*.
9. Install the *WLAN card*.

10. Install the *access panel*.
11. Install the *memory card*.
12. Install the *battery*.
13. Follow the procedures in *After Working Inside Your Computer*.

Display Panel

Removing The Display Panel

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Remove the *display assembly*.
11. Remove the *display bezel*.
12. Remove the screws that secure the display panel to the display assembly.

13. Lift the display panel from the display assembly.

14. Remove the tape that secures the display cable to the display panel.

15. Disconnect the display panel cable from its connector on the panel.

Installing The Display Panel

1. Install the display cable on the display panel.
2. Replace the tape to secure the display cable to the display panel.
3. Install the screws that secure the display panel to the display assembly.
4. Install the *display bezel*
5. Install the *display assembly*
6. Install the *palm rest*.
7. Install the *WWAN card*.
8. Install the *keyboard*.
9. Install the *hard drive*.
10. Install the *WLAN card*.
11. Install the *access panel*.
12. Install the *memory card*.
13. Install the *battery*.
14. Follow the procedures in *After Working Inside Your Computer*.

Display Brackets and Hinges

Removing Display Brackets And Hinges

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Remove the *display assembly*.
11. Remove the *display bezel*.
12. Remove the *display panel*.
13. Remove the screws that secure the display brackets and hinges to the display assembly.

14. Turn over the left display bracket and hinge.

15. Release the cables from the left hinge; then remove the left display bracket and hinge.

16. Release the cables from the right hinge; then remove the right display bracket and hinge.

Installing The Display Brackets And Hinges

1. Install the display brackets and display hinges.
2. Tighten the screws to secure the display brackets and hinges to the display assembly.
3. Route the cables into the right and left hinges.
4. Install the *display panel*
5. Install the *display bezel*
6. Install the *display assembly*
7. Install the *palm rest*.
8. Install the *WWAN card*.
9. Install the *keyboard*.
10. Install the *hard drive*.
11. Install the *WLAN card*.
12. Install the *access panel*.
13. Install the *memory card*.
14. Install the *battery*.
15. Follow the procedures in *After Working Inside Your Computer*.

Display Cable

Removing The Display Cable

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *hard drive*.
7. Remove the *keyboard*.
8. Remove the *WWAN card*.
9. Remove the *palm rest*.
10. Remove the *display assembly*.
11. Remove the *display bezel*.
12. Remove the *display panel*.
13. Remove the *display brackets and hinges*.
14. Peel the display cable from the adhesive affixing it to the display cover, and remove it from the display assembly.

Installing The Display Cable

1. Install the display cable affixing it to the display cover.
2. Install the *display brackets and hinges*.
3. Install the *display panel*.
4. Install the *display camera*.
5. Install the *display bezel*.
6. Install the *display assembly*.
7. Install the *palm rest*.
8. Install the *WWAN card*.
9. Install the *keyboard*.
10. Install the *hard drive*.
11. Install the *WLAN card*.
12. Install the *access panel*.
13. Install the *memory card*.
14. Install the *battery*.
15. Follow the procedures in *After Working Inside Your Computer*.

System Board

Removing The System Board

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *memory*.
6. Remove the *WLAN card*.
7. Remove the *optical drive*.
8. Remove the *hard drive*.
9. Remove the *keyboard*.
10. Remove the *WWAN card*.
11. Remove the *palm rest*.
12. Remove the *display assembly*.
13. Loosen the screws that secures the heat sink to the system board.

14. Disconnect the fan cable that secures the heatsink to the system board.

15. Remove the screws that secure the system board to the computer.

16. Lift the system board up and away from the computer.

Installing The System Board

1. Align the system board to the port connectors on the rear of the chassis and place the system board in the computer.
2. Tighten the screws to secure the system board in place.
3. Replace the fan cable.
4. Tighten the screws to secure the heatsink to the system board.
5. Install the *display assembly*.
6. Install the *palm rest*.
7. Install the *WWAN card*.
8. Install the *keyboard*.
9. Install the *hard drive*.
10. Install the *optical drive*.
11. Install the *WLAN card*.
12. Install the *memory*.
13. Install the *access panel*.
14. Install the *memory card*.
15. Install the *battery*.
16. Follow the procedures in *After Working Inside Your Computer*.

Input/Output Board

Removing The Input/Output (I/O) Board

1. Follow the procedures in *Before Working On Your Computer*.
2. Remove the *battery*.
3. Remove the *memory card*.
4. Remove the *access panel*.
5. Remove the *WLAN card*.
6. Remove the *optical drive*
7. Remove the *hard drive*.
8. Remove the *keyboard*.
9. Remove the *WWAN card*.
10. Remove the *palm rest*.
11. Remove the *display assembly*.
12. Remove the *system board*
13. Lift up the I/O board at an angle and remove it from the computer.

Installing The Input/Output Board

1. Install the Input/Output board into the slot.
2. Install the *system board*
3. Install the *display assembly*.
4. Install the *palm rest*.
5. Install the *WWAN card*.
6. Install the *keyboard*.
7. Install the *hard drive*
8. Install the *optical drive*.
9. Install the *WLAN card*.
10. Install the *memory*.
11. Install the *access panel*.
12. Install the *memory card*.
13. Install the *battery*.
14. Follow the procedures in *After Working Inside Your Computer*.

System Setup

System Setup Overview

System Setup allows you to:

- change the system configuration information after you add, change, or remove any hardware in your computer.
- set or change a user-selectable option such as the user password.
- read the current amount of memory or set the type of hard drive installed.

Before you use System Setup, it is recommended that you write down the System Setup screen information for future reference.

CAUTION: Unless you are an expert computer user, do not change the settings for this program. Certain changes can cause your computer to work incorrectly.

System Setup Enter

1. Turn on (or restart) your computer.
2. When the blue DELL logo is displayed, you must watch for the F2 prompt to appear.
3. Once the F2 prompt appears, press <F2> immediately.

NOTE: The F2 prompt indicates that the keyboard has initialized. This prompt can appear very quickly, so you must watch for it to display, and then press <F2> . If you press <F2> before you are prompted, this keystroke will be lost.

4. If you wait too long and the operating system logo appears, continue to wait until you see the Microsoft Windows desktop. Then, shut down your computer and try again.

System Setup Screens

Menu — Appears on top of the System Setup window. This field provides a menu to access the System Setup options. Press < Left Arrow > and < Right Arrow > keys to navigate. As a **Menu** option is highlighted, the **Options List** lists the options that define the hardware installed on your computer.

Options List — Appears on the left side of the System Setup window. The field lists features that define the configuration of your computer, including installed hardware, power conservation, and security features. Scroll up and down the list with the up- and down-arrow keys. As an option is highlighted, the **Options Field** displays the option's current and available settings.

Options Field — Appears on the right side of **Options List** and contains information about each option listed in the **Options List**. In this field you can view information about your computer and make changes to your current settings. Press < Enter > to make changes to your current settings. Press < ESC > to return to the **Options List**.

Help — Appears on the right side of the System Setup window and contains help information about the option selected in **Options List**.

NOTE: Not all settings listed in the Options Field are changeable.

Key Functions — Appears below the **Options Field** and lists keys and their functions within the active system setup field.

Use the following keys to navigate through the System Setup screens:

Keystroke	Action
< F2 >	Displays information on any selected item in the System Setup.
< Esc >	Exit from current view or switch the current view to the Exit page in the System Setup.
< Up Arrow > or < Down Arrow >	Select an item to display.
< Left Arrow > or < Right Arrow >	Select a menu to display.

Keystroke	Action
– or +	Change existing item value.
< Enter >	Select the sub menu or execute command.
< F9 >	Load setup default.
< F10 >	Save current configuration and exit System Setup.

System Setup Options

Main

System Information

System Date	Displays the computer model number.
System Time	Re-sets the date on the computer's internal calendar.
BIOS Version	Re-sets the time on the computer's internal clock.
Product Name	Displays the BIOS revision.
Service Tag	Displays the product name and the model number.
Asset Tag	Displays the service tag of your computer.
	Displays the asset tag of your computer (if available).

Processor Information

CPU Type	Displays the type of processor.
CPU Speed	Displays the speed of the processor.
CPU ID	Displays the processor ID.
L1 Cache Size	Displays the processor L1 cache size.
L2 Cache Size	Displays the processor L2 cache size.
L3 Cache Size	Displays the processor L3 cache size.

Memory Information

Extended Memory	Displays the memory installed on the computer.
-----------------	--

System Memory	Displays the memory in-built on the computer.
Memory Speed	Displays the memory speed.
Device Information	
Fixed HDD	Displays the model number and capacity of the hard drive.
SATA ODD	Displays the model number and capacity of the optical drive.
eSATA Device	Displays information about the installed eSATA device.
AC Adapter Type	Displays the type of the AC adapter.

Advanced

Intel SpeedStep	Enable or disable the Intel SpeedStep feature.	Default: Enabled
Virtualization	Enable or disable the Intel Virtualization feature.	Default: Enabled
Integrated NIC	Enable or disable the power supply to the on-board network card.	Default: Enabled
USB Emulation	Enable or disable the USB emulation feature	Default: Enabled
USB Powershare	Allows the computer to charge external devices using the stored system battery power through the USB PowerShare port, even while the computer is turned off.	Default: Enabled
USB Wake Support	Allows USB devices to wake-up the computer from standby. This feature is enabled only when the AC adapter is connected.	Default: Disabled

SATA Operation	Change the SATA controller mode to either ATA or AHCI.	Default: AHCI
Adapter Warnings	Enables or disables adapter warnings.	Default: Enabled
Function Key Behavior	Specifies the behavior of the function key <Fn> .	Default: Function key first
Charger Behavior	Specifies if the computer battery will be charged when connected to an AC power source.	Default: Enabled
Miscellaneous Devices	These fields let you enable or disable various on board devices.	

Security

Set Service Tag	This field displays your system's service tag. If the service tag is not already set, this field can be used to enter it.
Set Supervisor Password	Allows you to change or delete the administrator password.
Set HDD Password	Allows you to set a password on the computer's internal hard drive (HDD).
Password Bypass	Allows you to bypass the system password and the internal HDD password prompts during a system restart/resume from hibernate state.
Computrace	Enable or disable the Computrace feature on your computer.

Boot

Boot Priority Order	Specifies the order of different devices in which the computer will boot through at start up.
Hard Disk Drives	Specify which hard drive the computer can boot through.

USB Storage Device	Specify which USB storage device the computer can boot through.
CD/DVD ROM Drives	Specify which CD/DVD the computer can boot through.
eSATA	Specify which eSATA device the computer can boot through.
Network	Specify which network device the computer can boot through.

Exit

This section allows you to save, discard, and load default settings before exiting from System Setup.

Diagnostics

Device Status Lights

-  Turns on when you turn on the computer and blinks when the computer is in a power management mode.
-  Turns on when the computer reads or writes data.
-  Turns on steadily or blinks to indicate battery charge status.
-  Turns on when wireless networking is enabled.

Battery Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

- **Alternately blinking amber light and white light** — An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop.
- **Alternately blinking amber light with steady white light** — Temporary battery failure with AC adapter present.
- **Constantly blinking amber light** — Fatal battery failure with AC adapter present.
- **Light off** — Battery in full charge mode with AC adapter present.
- **White light on** — Battery in charge mode with AC adapter present.

Diagnostic Beep Codes

The following table shows the possible beep codes that may be emitted by the computer when your computer is unable to complete a power on self test.

Beep	Possible Cause	Troubleshooting Steps
1	BIOS ROM checksum in progress of failure.	System board failure, covers BIOS corruption or ROM error
2	No RAM detected	No memory detected
3	<ul style="list-style-type: none"> • Chipset Error (North and South Bridge Chipset, DMA/IMR/Timer Error) • Time-Of-Day Clock test failure • Gate A20 failure • Super I/O chip failure • Keyboard controller test failure 	System board Failure
4	RAM Read/Write failure	Memory failure
5	Real-time clock power fail	CMOS battery failure
6	Video BIOS Test Failure	Video card failure
7	Processor Failure	Processor Failure
8	Display	Display Failure

Specifications

 **NOTE:** Offerings may vary by region. The following specifications are only those required by law to ship with your computer. For more information regarding the configuration of your computer, click **Start** → **Help and Support** and select the option to view information about your computer.

System Information

Chipset:	
Vostro 3350/ 3450/ 3550/ 3750	Intel HM67
Vostro 3555	AMD A70M
Processor:	
Vostro 3350/ 3450/ 3550/ 3750	<ul style="list-style-type: none">• Intel Core i3 / i5 series• Intel Core i7 (Quad-Core for Vostro 3750 only)
Vostro 3555	<ul style="list-style-type: none">• AMD Dual Core• AMD Quad Core

Memory

Memory connector	two SODIMM slots
Memory capacity	1 GB, 2 GB, and 4 GB
Memory type	DDR3 SDRAM with 1333 MHz
Minimum memory	2 GB
Maximum memory	8 GB

 **NOTE:** Only 64-bit operating systems can detect memory capacities greater than 4 GB.

Video

Video type	<ul style="list-style-type: none">• integrated on system board• discrete video card
Video controller and memory	
UMA:	
Vostro 3350/ 3450/ 3550/ 3750	Intel Graphics Media Accelerator HD
Vostro 3555	AMD Radeon HD series — up to 256 MB / 512 MB of shared memory
Discrete:	
Vostro 3350	AMD Radeon HD6490 GDDR5 - 512 MB
Vostro 3450/ 3550	AMD Radeon HD6630 - 1 GB VRAM
Vostro 3750	NVIDIA GeForce GT 525M - 1 GB

Communications

Network adapter	10/100/1000 Mbps Ethernet LAN
Wireless	internal wireless local area network (WLAN) and wireless wide area network (WWAN)

Ports and Connectors

Audio	one microphone connector and one stereo headphones/ external speakers connector
Video	
Vostro 3350/ 3450/ 3550/ 3555/ 3750	one 19-pin HDMI connector and one 15-pin VGA connector
Network adapter	one RJ-45 connector
USB	
Vostro 3350	two USB 3.0-compliant connectors and one eSATA/USB 2.0-compliant connector
Vostro 3450	two USB 3.0-compliant connectors, one USB 2.0-compliant connector and one eSATA/USB 2.0-compliant connector

Ports and Connectors

Vostro 3550	two USB 3.0-compliant connectors, one USB 2.0-compliant connector and one eSATA/USB 2.0-compliant connector
Vostro 3555	three USB 3.0-compliant connectors and one eSATA/USB 2.0-compliant connector
Vostro 3750	two USB 3.0-compliant connectors, one USB 2.0-compliant connector and one eSATA/USB 2.0-compliant connector
Memory card reader	one 8-in-1 memory card reader
fingerprint reader	one

Keyboard

Number of keys

Vostro 3350/ 3450/ 3550/ 3555	United States: 86 keys, United Kingdom: 87 keys, Brazil: 87 keys, and Japan: 90 keys
Vostro 3750	United States: 101 keys United Kingdom: 102 keys Brazil: 104 keys Japan: 105 keys

Temperature range:	
Operating	0 °C to 35 °C (32 °F to 95 °F)
Non Operating	–40 °C to 65 °C (–40 °F to 149 °F)

Physical

Vostro 3350:

Height	27.30 mm to 29.80 mm (1.07 inches to 1.17 inches)
Width	329.20 mm (12.96 inches)
Depth	228.50 mm (9.00 inches)
Weight (Minimum)	2.04 kg (4.50 lb)

Vostro 3450:

Height	30.60 mm to 33.20 mm (1.20 inches to 1.31 inches)
Width	343.00 mm (13.50 inches)
Depth	245.80 mm (9.68 inches)
Weight (Minimum)	2.28 kg (5.02 lb)

Vostro 3550/3555:

Height	30.40 mm to 34.80 mm (1.20 inches to 1.37 inches)
Width	375.40 mm (14.78 inches)
Depth	260.20 mm (10.24 inches)
Weight (Minimum)	2.47 kg (5.45 lb)

Vostro 3750:

Physical	
Height	30.80 mm to 34.80 mm (1.21 inches to 1.37 inches)
Width	418.40 mm (16.47 inches)
Depth	286.70 mm (11.29 inches)
Weight (Minimum)	3.00 kg (6.62 lb)
Environmental	
Temperature:	
Operating	10 °C to 35 °C (50 °F to 95 °F)
Storage	-40 °C to 65 °C (-40 °F to 149 °F)
Relative humidity (Maximum):	
Operating	10 % to 90 % (noncondensing)
Storage	5 % to 95 % (noncondensing)
Airborne contaminant level	G1 or lower as defined by ISA-S71.04–1985

Contacting Dell

Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

1. Visit **support.dell.com**.
2. Select your support category.
3. If you are not a U.S. customer, select your country code at the bottom of the page, or select **All** to see more choices.
4. Select the appropriate service or support link based on your need.
